

Sea Turtles: Amazing Pictures and Animal Facts Everyone Should Know (The Animal Kids Books Series) (Volume 1)

Sea Turtles is the first in a series of books exploring the animal kingdom using both words and amazing pictures of animals. The world of animals comes in all shapes and sizes and includes mammals, birds, fish, reptiles and amphibians. And, whether we are talking about wild animals or their more familiar domestic counterparts, we are talking about a fascinating world that you can spend a lifetime exploring, and only scratch the surface. Sea Turtles - Amazing Pictures and Animal Facts Everyone Should Know looks at what many people consider to be weird sea creatures. It would however perhaps be more accurate to describe them as prehistoric sea creatures, because they represent some of the oldest living creatures known today. The relatively small number of endangered sea turtles that share this planet with us today are the most amazing animals, and this text and animal pictures book contains a wealth of amazing animal facts. With an ancestry dating back to the early days of the dinosaurs here on earth, the book looks at the life of 7 of the world's oldest and most incredible creatures: The king of the marine turtles - the leatherback sea turtle. The stunningly beautiful hawksbill sea turtle. The big-headed loggerhead sea turtle. The grazing green sea turtle. The heart-shaped olive Ridley sea turtle. The Australian sea turtle - the flatback. The baby of the marine turtles - the Kemp's Ridley. After a lifetime spent studying the animal kingdom at first hand as she has traveled the globe, Ann Lawrence brings the world of these marine creatures to life with some of the most amazing pictures you will find anywhere. *** Download your copy of Sea Turtles today! *** Please note that the Kindle version of this book includes a downloadable Sea Turtles Quiz book (in PDF format) and that purchase of this paperback version of the book also entitles you to a free copy of the Kindle book.
