

HARPERS DARKNESS

Harper is a hitman hoping to retire. The only problem is what is he going to do with the Monster? It has always helped him murder his victims. Does he leave it behind or will something more horrifying happen? Then there's the kid in Harper's building who talks about leaving his parents, about how they're aliens or demons. The kid is, of course, a little strange, but if he's serious, Harper may be in trouble. Included with this short story are four chapters of LOSTNESS, the new sequel to the novel, BANISHED. Fallen angels roam the earth, the most vicious of which is Angelique. Nick ran from her, thinking her dead, but Angelique does not die. She never dies. She is the plague on Nick's soul and the scourge of the Earth. Nick is lost in the land of Lostness and his way out may lie with another of the Fallen. Billie Sue Mosiman is an award-nominated author of suspense and the supernatural. Her latest novel is THE GREY MATTER from Post Mortem Press.
