

Blood Vendetta (Executioner)

Human Target An American hacker becomes target number one after she accesses the account of a Russian mob boss, revealing his organizations terror plot against the U.S. by taking out its satellite system. She knows two things: theyre coming for her and shes out of her league. Having the intel the hacker stumbled into could prevent millions of deaths, and Mack Bolan is determined to find her before the Russians do. Theres only one problem. No one knows what she looks like. And when one of her friends compromises her location in London, the Executioner knows he must make his final move and end this high-stakes game of hide and seek...one way or the other.
