

The Three Planetees [The Two Thousand Centuries] (Annotated - Illustrated)

Their DArtagnan Was A Woman! In this classic space opera, when Haskell Trask, tyrant of the League of Cold Worlds (Jupiter, Saturn, Neptune), seeks to conquer the democratic Alliance of Inner Worlds, freedoms last hope lies the outlaw trio known as the Three Planetees. Secretly agents of the Alliance, the Planetees--Sual Ave of Venus, Gunner Welk of Mercury, and John Thorn of Earth--learn that Trask possesses a terrible new weapon powerful enough to defeat the space navies of the inner worlds. All Trask needs is to locate and seize the systems only known supply of the power metal, radite. Fleeing Earth in a running space battle with the police, the Planetees discover that the only person who can lead them safely to the radite is Lana Cain, the legendary Pirate Princess of the buccaneering Companions of Space. When the Planetees learn Cains real mission is to clear her father of a false charge of piracy, the four join forces, and she agrees to help them find the radite. But news of their plan leaks out to her fellow members of the Companions, and soon Lana and the Planetees are being sought by both the Companions of Space and the League of Cold Worlds. From planet to planet, in space, on asteroids and moons, Lana and the Planetees must battle against impossible odds to prevent the radite from falling into the wrong hands. And their only chance of success rests in the questionable loyalty of the self-pitying, pleasure-loving in old space pirate, Stilicho Keene and the fangs of a space dog named Ool. This is the first ever book republication of this epic 1940s space adventure from the legendary pulp, Startling Stories. What Hamilton did best, according to Donald Tucks Encyclopedia of Science Fiction and Fantasy, involved the creation and popularization of the classic early space operas [presenting] galaxy-spanning conflicts between humans

and other races, piratical or merely monstrous, [which in turn] did much to define the fields sense of wonder? That Hamilton did all this without ever losing the human scale, indeed, the human touch, is a tribute to his genius and evident even in such a thundering adventure as this celebrated romance of the future. Set in the same future history as Captain Future! Enhanced Edition! Original magazine illustrations. Introduction about Edmond Hamilton, creator of the space opera. Plus a never reprinted piece by Hamilton about the writing of and inspiration for The Three Planeteers, and a chronology of his future history which we call The Two Thousand Centuries.
