

The Mysterious Doctor Cornelius 3: The Rochester Bridge Catastrophe (French science fiction Book 111)

The modern literary archetype of the mad doctor is wonderfully incarnated in French proto-science fiction by Dr. Cornelius Kramm, the star of *The Mysterious Dr. Cornelius*, a sprawling saga serialized in eighteen volumes in 1912-13, written by the prolific Gustave Le Rouge, author of *The Vampires of Mars* and *The Dominion of the World*. Dr. Cornelius Kramm and his brother, Fritz, rule an international criminal empire called the Red Hand. Cornelius is a brilliant surgeon, nicknamed the Sculptor of Human Flesh because of his diabolical ability to alter peoples likenesses through the science of carnoplasty. Cornelius growing, global, evil web eventually causes the creation of an alliance of heroes, who band together to fight him and, ultimately, defeat the Lords of the Red Hand. These heroes are: Dr. Prosper Bondonnat, an equally brilliant French scientist, biologist and botanist; American billionaire William Dorgan and his son, Harry Dorgan, who is also in love with the beautiful Isadora Jorgell, Baruchs good-hearted sister; and finally British Lord Burydan, a colorful, freebooting adventurer. Cornelius Kramms evil schemes are ultimately defeated after a globe-spanning battle by this alliance of good scientists, lovers, and brave men. However, the ultimate fate of the master villain remains ambiguous... Gustave Le Rouge (1867-1938) was one of the authors who most embodied the evolution of modern science fiction, moving it away from the juvenile adventures of Jules Verne by incorporating real people with real emotions into his stories, thus bridging the gap between Vernian and Wellsian science fiction.
