

# Heinemann 16-19 Geography: Global Challenges Student Book

Everything you need for your Edexcel A Level Geography course; Heinemann 16-19 Geography offers a complete range of stimulating resources. The approach of the books is specifically designed to help bridge the gap between GCSE courses and the requirements of A Level Geography. The two new Student Books exactly meet the requirements of the new Edexcel B specification for AS Level and A2 Geography. Changing Environments covers the AS part of the new specification and is pitched at the right level. Global Challenges covers the A2 section and will contain the more stretching, in-depth material required at this level. Each full-colour Student Book includes: exactly the right level of detail for the key topics so that students can be confident they have covered the course fully; substantial case studies, clearly set in context to reinforce and illustrate key geographical concepts; a range of opportunities for fieldwork, independent research and for using ICT; vocabulary, structure and approach to match the specification exactly; coverage of geographical skills and techniques to boost confidence and aid exam preparations; carefully focused questions to enhance knowledge and understanding of the required themes. The Student Book for the A2 section of the course.
